

Freedom means choice. I have the ability to listen to XM radio and its commercial free broadcasts or if I choose, listen to hours of commercials on services that I will never use on regular radio. I have chosen XM radio because I choose not to listen to money driven commercial laden radio. The NAB has brought this on themselves and the public is rejecting their programming by the millions. Now they cry. Do not take away my freedom of choice. They have the freedom to redirect their programming and win back their audience. The government need not be involved in poor business planning on their part. Thank you.
